

Make sure it is genuine

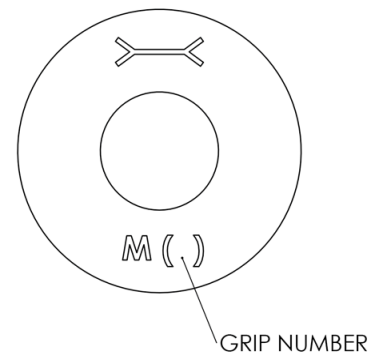

Huck®

How do you ensure that it's genuine Huck product?

- Huck fasteners have a lazy 'H' head marking.
- Most head markings on Huck Fasteners are raised rather than stamped. This is because a raised mark must be raised during the forming process, but indented mark could be added later by a counterfeiter.
- Fasteners are easily identified during the installation process.

IDENTIFICATION ON SLEEVE HEAD

The most effective fastening solutions begin with a simple idea.

Star Fasteners (UK) Ltd are well established as a leader in the global Huck fastener distribution network. We are committed to supplying customers with the highest quality and most innovative fastening solutions on the market.
